

EDUCATION in ACTION at JES

Mrs. AnneMarie MacDonald and grade 2 and 3 Field School this Fall

This month, grade two and three classroom teacher, AnneMarie MacDonald, along with her class of adventurous students, have been forging a new path in education: Field school.

Field school provides students with many opportunities to be involved in learning in non-traditional ways. The activities utilize local experts and resources in order to present the curriculum in a fun and interactive manner! Taking place over a number of days and covering many cross-curricular outcomes, field school benefits from the beauty of our natural surroundings in the National Park.

Here are some photographs of the students engaged in their learning during several field school outings to discover rocks and minerals in their natural environment, including an excursions Medicine Lake, Maligne Canyon, Jasper Rock and Jade. Bringing the learning closer to home, the students made salt scrubs and learned how minerals help us in our daily lives! Keep learning through

hands on activities.

Mrs. Morgan's first grade magical, mysterious, and creative classroom

There's no doubt about it Mrs. Morgan's students have been busy crafting and creating a class of awesome activities since the beginning of the school year. The mystery and magic that transpires the walls of Room 4 is marvelous! Learning is about lighting the creative fire under our students; Mrs. Morgan, you are the matchstick!
